background

In the Department of Health Eastern Metropolitan Region (EMR) there are 8 pension level Supported Residential Services (SRS). The SRS sector are a large and important part of the continuum of supported accommodation in Victoria, providing accommodation and care for some of the most vulnerable and disadvantaged in the community. Hospitals, community mental health services, general practitioners, disability services and psychiatric disability services generally refer individuals to SRS, however it has been reported that preferred procedure is often not followed and some individuals arrive with no medical records. Another major issue is that referral often occurs on a Friday when other external supports close for the weekend.

The Department of Human Services (DHS) developed an SRS Referral Form in 2003 however it appeared to be under utilized by both SRS and referral agencies and there has been no uniform approach to its implementation.

introduction

each was funded by the Department of Health to explore the current referral process to SRS and identify and promote a new process through the development of an Information Resource, including referral procedure to better facilitate the most appropriate accommodation choices for individuals.

A Project Worker was employed and met with all 8 SRS and 17 referral agencies to document what was working and not working with the current referral process. A Steering Committee was developed in early October 2009. The purpose of the Steering Committee was:

- To improve referral to pension level SRS in the EMR from a range of relevant service providers.
- To improve the sharing of information to best support individuals living in SRS.
- Increased information regarding prospective residents, to support Proprietors ability to determine suitability and care planning.
- Contribute to discussions regarding the development of an information kit and referral process to improve suitable living arrangements for individuals.

This resource provides information on what is an SRS, the services provided, as well as an overview of individual pension level SRS in the EMR including location, number of beds, cost, demographics, financial management and staffing. The resource also has a Preferred Referral Procedure and SRS Referral Form. A summary referral flowchart is located at the back of the resource and can be placed on the wall as a visual prompt for staff.

“ the supported residential services sector is a large & important part of the continuum of supported accommodation in victoria, providing accommodation & care for some of the most vulnerable & disadvantaged in the community ”

supported residential services

SRS are generally privately owned and operated facilities that provide accommodation, housekeeping, meals and special or personal care services.

The Department of Health (DH) licenses the Proprietor of an SRS and regulates their activities through the Health Services Act 1988 (The Act) and the Health Services (Supported Residential Services) Regulation 2001 (The "Regulations")

There are currently 181 SRS throughout Victoria that fall into two broad sectors:

The above-pension sector with a population of older, frail adults; and

The pension-level sector with a population of adults with a disability (particularly psychiatric disability, intellectual disability and acquired brain injury), chronic health problems, problematic drug and alcohol use, and sometimes with a history of homelessness.

services provided

In keeping with the "Regulations", each SRS is required to employ a personal care coordinator who is responsible for the coordination and continuity of care for residents. The minimum qualification for the personal care coordinator is a Certificate III in Community Services (Aged Care Work/Personal Carer) or equivalent.

The Personal Care Worker will be on staff during the day and evening (this person may be the personal care coordinator).

Special or personal care means:

Assistance or support with one or more of the following:

- Personal hygiene.
- Support with meals.
- Physical assistance for persons with mobility problems or assistance for people who are mobile but require some assistance.
- Assistance or supervision in taking medication.
- Provision of substantial emotional support.

The Regulations require that the Proprietors develop and implement care plans for all residents of the SRS. Immediate and longer term Care Plans are developed with the resident and consider the physical, emotional, spiritual, financial and social supports or assistance an individual may require.

srs and mental health services

SRS currently provide an important accommodation option for many people with a mental illness who do not have other accommodation options, and who would have difficulty caring for themselves.

Increasingly, SRS with fees set at the level of pension, are reporting that people with complex needs are forming a significant part of their client group. Just over half of the residents of pension level facilities have a mental illness, and many will also have other disabilities such as those resulting from an acquired brain injury and/or drug and alcohol problems. This population of individuals has more disabilities and their needs are more complex than those of the older frail population to whom SRS were providing a service ten or more years ago.

Consideration should be given to whether an SRS is the most appropriate placement for an individual given the level of care that is able to be provided, the qualifications of staff, relatively low staffing levels and the sometimes high number of residents living in one setting.

the following is an information profile of the 8 pension level srs in the eastern metropolitan region:

supported residential services preferred referral procedure

the following procedure has been developed in collaboration with the 8 pension level srs's in the eastern metropolitan region, and is the preferred method of procedure for agencies referring individuals into an srs:

Referral of individuals into Supported Residential Services is most desirable between Monday and Thursday before 3pm. It is understood that this may not always be possible, however this is the expressed wish of Proprietors and Managers of the SRS's for a number of reasons including:

- SRS's require that all individuals' medication be in a Webster pack – this can only be coordinated by a pharmacy and not all pharmacy's are open after 5pm in the afternoon.
- Over the weekend the SRS Proprietor / Manager is usually not at the facility to acquaint a new resident, as well as support the existing residents in the transition of a new resident.
- Over the weekend the extra supports that a new resident to an SRS may require are often closed over the weekend and with limited knowledge of the individual this can lead to inadequate support for the new resident.
- Crisis situations can occur over the weekend with individuals new to the SRS and once again support services are not open over the weekend to support the individual or the SRS staff.

referral procedure

1. phone contact

Contact the SRS and identify if there is a vacancy

2. prospective resident to visit the facility with the referring agency

Organise a time for the prospective resident to see the residence, meet the Proprietor / Manager and other residents and the option to have a planned gradual entry to the facility.

3. department of health srs referral form

Department of Health SRS Referral Form to be completed and either faxed or emailed – please refer to the information on the individual SRS's for this information.

The Mandatory fields to be completed on this form include:

- Consent to release information
- Medication information
- Behaviour information – particularly relating to violence, sexualized behaviours and anti-social behaviours that have been displayed in the last 12 months.

Please note that incomplete forms may be sent back and delay the placement. In this situation further contact should be made with the Proprietor / Manager.

4. negotiation with srs proprietor / manager

Discussions with Proprietor / Manager regarding placement of individual in the facility.

5. day of arrival

On the day the new resident arrives at the SRS they are to be accompanied by someone from the referring agency. Please ensure the individual has with them:

- ✓ Clothing
 - ✓ Toiletries
 - ✓ Medication
 - ✓ Medication chart
-

6. follow up from the referral agency

The referral agency to contact the SRS a week following the individual moving in, to assess how the individual is going.
